Ad 1: Celestron C9.25 Schmidt-Cassegrain OTA (CG-5 dovetail), like new
Price: $1,200

Celestron 9.25" SCT optical tube in new condition. Used twice, optics spotless, no scratches or marks. Selling because I'm downsizing my setup due to physical condition.

- 235mm (9.25") aperture, 2350mm focal length, f/10
- StarBright XLT coatings for brighter, higher-contrast views
- Fastar-compatible secondary, so it can image at f/2 with a HyperStar (sold separately)
- CG-5 style dovetail fits the Advanced VX, CG-5 and other Vixen-style saddles
- Compact: about 22" long and about 20 lbs
- A few extra barlow lenses, and solid carrying case purchased separately

TELESCOPE ADS

Great for planets, the Moon, and deep-sky observing or imaging, with noticeably more light than an 8". Comes with box, and everything it came with originally, and a few barlow lenses and carrying case purchased separately.

Local pickup in St. Louis only. Cash, venmo or zelle only please. Email PinkWall2323@gmail.com.

Serious offers welcome. I'm also selling the barely used matching Celestron Advanced VX (AVX) Computerized GoTo Equatorial Mount, a never used ZWO ASI462MC Color Planetary Camera, a brand new StarSense auto alignment system to take the manual set up work out, and a fully assembled but never used heavy duty dolly made for this and heavier telescopes for ease of moving, so ask about the complete and turn-key bundle.

Ad 2: Celestron Advanced VX (AVX) Computerized GoTo Equatorial Mount, like new
Price: $750

Celestron Advanced VX computerized German equatorial mount and tripod, used twice. Retail $1,199. Selling because I'm downsizing my setup due to physical condition.

- 30 lb payload, so it handles a C9.25, an 8" SCT or a small refractor
- Dual saddle that takes both CG-5 (Vixen) and CGE-width dovetails
- NexStar+ hand control with USB and a 40,000+ object database
- PEC, autoguider port, and the ability to image past the meridian
- 2" stainless steel tripod legs, 44"–64" height range
- 7°–77° latitude range

Includes the mount head, tripod, accessory tray, two 12 lb counterweight, NexStar+ hand control and DC power cable (cigarette-lighter plug). Mount head is 17 lbs, tripod 18 lbs.

Ad 3: ZWO ASI462MC Color Planetary Camera, like new
Price: $150

ZWO ASI462MC planetary and guide camera, never used.

- Sony IMX462 sensor, 1936×1096 (2.1MP), 2.9µm pixels
- Very low read noise (0.47–2.65e) and up to 136 fps over USB 3.0
- Strong near-IR sensitivity, good for planetary and lunar work through IR-pass filters
- ST4 port, so it also works as an autoguiding camera
- Includes the fisheye lens for all-sky use

A great match for an SCT like the C9.25 at f/10 for planets. Comes with everything as it is new.

Ad 4: Celestron StarSense AutoAlign, brnad new
Price: $350

Brand new Celestron StarSense AutoAlign. Retail is $479 before tax and shipping. It aligns your GoTo telescope automatically in about 3 minutes, with no star hopping or picking alignment stars. It also does mount modeling for accurate pointing from horizon to horizon.

Works with most Celestron computerized mounts, including the AVX, CGEM, CPC and NexStar SE. Includes the camera, mounting bracket and StarSense hand control. Still in the box.

Ad 5: JMI Heavy-Duty Large Universal Wheeley Bar Telescope Dolly with tie-down kit, brand new
Price: $500

Brand new fully assembled but never used large heavy-duty steel telescope dolly with locking wheels and leveling bolts [pictures are of size medium, mine is put away and larger]. Roll your fully assembled scope, mount and cables in and out of the garage without tearing down or re-aligning. Saves your back and saves setup time. Selling because I'm downsizing my setup due to physical condition.

- Large size, for wide tripod stances and taller setups
- Rated for up to 300 lbs
- Leveling bolts give a stable platform for imaging and high-power viewing
- Includes the tie-down bracket kit
